

## S. M. WILSON INTRODUCES NEW CONSTRUCTION CAREER EDUCATION PROGRAM

**SKILLED**

For decades, S. M. Wilson has proudly built education facilities, and our work has had a tremendous impact on our community. Project teams have presented to classes, hosted project tours and organized activities to engage student interest in the construction industry. In addition to supporting individual student interest, we strive to support the serious needs of our industry to promote career paths in the trades and provide access to those careers.

This year, we have formalized these efforts and rolled them into our existing career development initiatives to form **SKILLED**, with the mission to Inspire the Future of Construction. The three-pronged program supports individuals from all experience levels, from Pre-K students to workforce professionals, to Discover, Develop and Elevate their skills in the construction industry.
